Freie Universität  Berlin

m.a. in visual and media anthropology

The concept of the exhibition is a kind of time travel through the technical developments of Visual Anthropology and an exposure of diverse forms of doing ethnographic research in different (trans)cultural spaces - be this in person or with an Avatar in virtual worlds - according to the format mix from analog photography over Super-8 to digital photography, screenshots and screencasts in virtual cultures.

The exhibition shows some of the second and third semester projects from the following courses: Visual Anthropology in Virtual Cultures (Undine Frömring), Sigh defects inspire to artistic work (Desiree Palmen), Transcultural Montage (Florian Walter), Experimental Photography (Chris Wright).
